

ADS, VH, ICF Day Program, and Transportation COVID-19 Risk/Benefit Discussion Guide

Name of Person: _____

Situational Risks	Circle/check if present
The person is not able to follow the social distancing protocol with 6 feet of distance (2); with minimal prompting/assistance (1)	2 1
The person is not able to use personal protective equipment (PPE) for extended periods of time (2); or with minimal prompting/assistance (1)	2 1
The person has Homemaker/Personal Care (HPC) or other paid support personnel at home	1
The person requires physical prompting/assistance to complete ADLs, such as toileting, eating, or mobility (Requires close contact with DSP)	2

Total Number of Situational Risks above: _____

Health Related Risks	Circle/check if present
The person has diabetes	2
The person is severely obese	2
The person is older than 40 years old (1); 60 years old (2)	1 2
The person has known respiratory issues	2
The person has known cardiac disease, including hypertension	2
The person has immunocompromising conditions (ex: HIV, cancer, post-transplant, Prednisone treatment, etc.)	2
The person has a renal disease	2
The person has any other underlying health problems	1

Total Number of Health Related Risks above: _____

Home Related Risks	Circle/check if present
Risks to others who live with the person (family, caregivers, roommates)	
People with Diabetes	2
People with obesity	2
People older than 40 years old (1); 60 years old (2)	1 2
People with respiratory issues	2
People who have known cardiac disease (including hypertension)	2
People who have any immunocompromising conditions (ex: HIV, cancer, post-transplant, prednisone treatment, etc.)	2
People with renal disease	2
People with any other underlying health problems	2

Sum of Situational Related Risks: _____
 Sum of Health Related Risks: + _____
 Sum of Home Related Risks: + _____
 Situational + Health + Home = **TOTAL RISK** = _____

If Total Risk is **greater than 8**,
 If Total Risk is **between 3-7**,
 If Total Risk is **less than 3**,

HIGH RISK to return to ADS, VH, or ICF Day Program
MODERATE RISK to return to ADS, VH, or ICF Day Program
LOW RISK to return to ADS, VH, or ICF Day Program

RISK LEVEL _____

Benefits to Person	Circle/check if Present
Socialization is important to the person (1); Lack of socialization has known serious risks to known mental health conditions. (2)	1 2
A sense of normalcy/routine is important to the person (1); lack of routine has known serious risks to know mental health conditions. (2)	1 2
Daily activity outside the home is likely to reduce the frequency of behavioral issues.	2
Income	2
Parents are employed and Supervision is needed	1
No other supervision is available	2
Needs the medical support of ADS/VH. (i.e. med admin, medical check-in)	1
If not in a structured program, the person may be wandering in the community or engaging in risky, non-social distancing activities	3
Other Benefit:	1

Sum of Benefits: _____

BENEFIT LEVEL: _____

If Benefits are **5 or greater**,
 If Benefits are **3-4**,
 If Benefits are **0-2**,

HIGH BENEFIT from returning to ADS, VH, or ICF Day Program
MODERATE BENEFIT from returning to ADS, VH, or ICF Day Program
LOW BENEFIT from returning to ADS, VH, or ICF Day Program

Other Considerations: _____

If any member of the team (including all providers: day service, transportation, and residential) and the housemate's team disagree about a return to facility-based Adult Day Support (ADS), Vocational Habilitation (VH), or Intermediate Care Facility (ICF) Day Program, recommend not returning to facility-based ADS, VH, or ICF Day Program at this time and reassess at a later time (for example, in one week). The team should consider, any time in the process, alternative ADS, VH, or ICF Day Program options for service delivery, including virtual or in-home services.

Higher total scores indicate a greater risk of poor health outcomes from COVID-19 infection. There is not a specifically designated score that qualifies or excludes a person. The score here is to gain data for planning

purposes. Please consult with the person's primary health care providers for specific health care considerations related to person-centered planning.

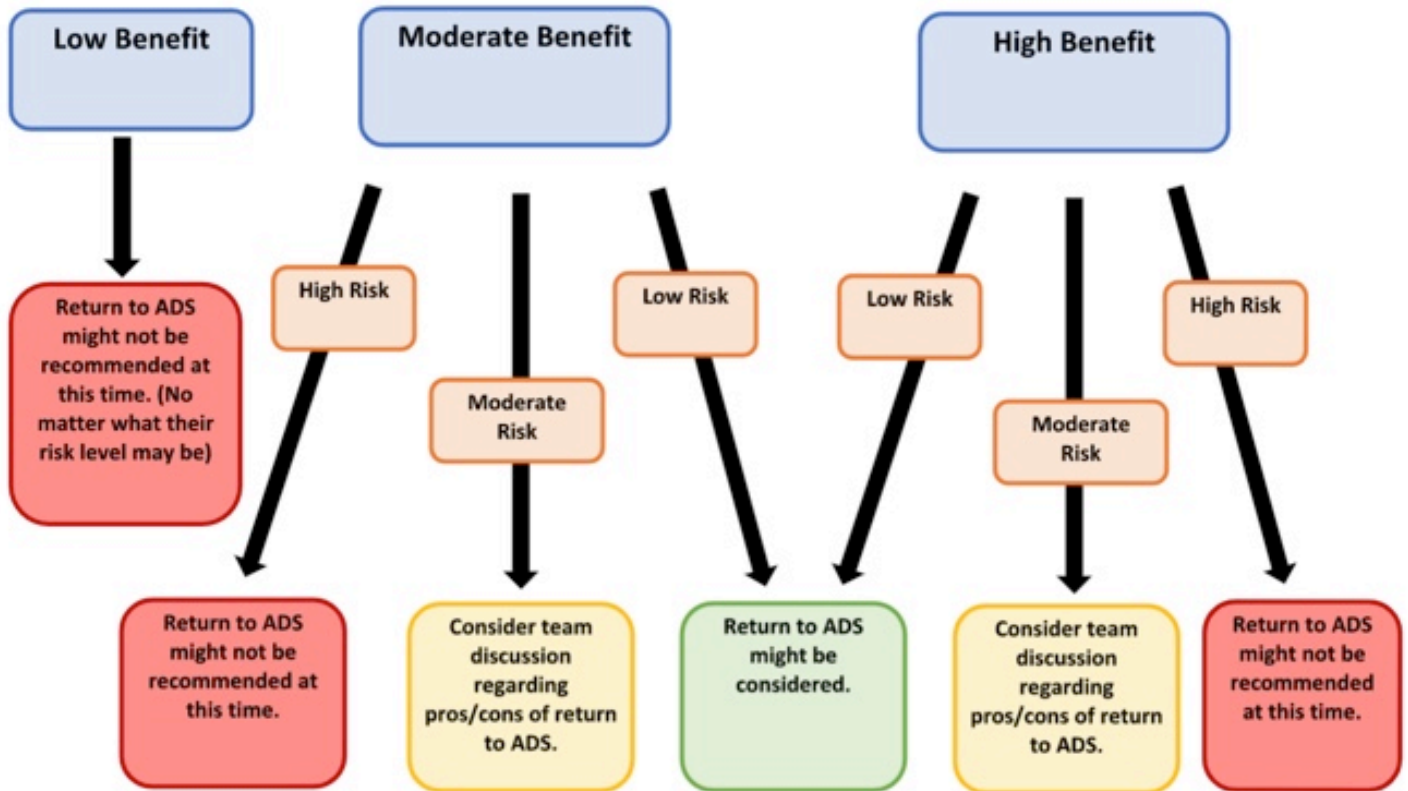

Discuss with a health care professional to determine if there any potential mitigation of risks if a person has had COVID-19 and recovered.

Note: This is not a validated tool. The total score may be reported to facility/agency personnel for the estimation of stratified patient risk.
